PROFESSIONAL SUMMARY

MERN Stack Developer and AI Automation Engineer with close to a year of professional experience building full-stack applications and intelligent automation systems. I sit at the intersection of modern web development and AI, comfortable writing clean React/Next.js frontends, solid Node.js backends, and wiring up AI workflows that actually solve business problems. Fast learner, selfdriven, and genuinely excited about where AI and software are heading. Looking for a full-time role where I can grow, contribute, and build things that matter.

WORK EXPERIENCE

Web Developer - Jul 2026 to Present
CNI - AI & Digital Division

Web Developer Intern - Apr 2026 to Jun 2026
CNI - AI & Digital Division

Web Developer - Sept 2025 to Present
Freelancer

- Delivered 6+ client projects including dashboards, lead-gen sites, booking apps, full-stack platforms, using React, Next.js, Tailwind CSS, and Supabase, often under 7-day deadlines.

- Secured client data via Supabase (Postgres, RLS, Storage) without dedicated backend infrastructure.
- Integrated AI/automation — n8n + OpenAI booking chatbot with session memory, EmailJS flows cutting response time to under 1 hour.
- Build PAF dashboard parsing 1,500+ record xlsx file (69+ columns) with filtering, search, and Excel export at zero server cost.
- Architected a multi-service async SaaS backend where Express, n8n automation, and LLM APIs communicate via webhooks and callbacks, keeping API response under 100ms while AI generates websites, 12-week programs, and email sequences in the background.

EDUCATION

Bachelor of Computer Science - Completed from 2022 to 2026.

PMAS ARID Agriculture University

- Major in Computer Science
- CGPA: 3.31

SKILLS

- **Frontend**: React.js, Next.js, Tailwind CSS, TypeScript, HTML, CSS, JavaScript
- **Backend**: Node.js, Express.js, Nest.js, REST APIs, Webhooks
- **Databases**: Firebase, Supabase, SQL, MongoDB
- **AI & Automation**: n8n, OpenAI API, Retell AI, Prompt Engineering
- **Dev Tools**: Git, GitHub, Postman, Vercel, Netlify

PROJECTS

- **Ali Haider Engineering Works, Business Website** Designed and developed a professional 5-page Next.JS business website for an engineering works company, featuring a service showcase, project gallery, and fully functional contact form with EmailJS integration. Deployed on Vercel with a fully responsive Tailwind CSS layout, reducing client inquiry response time and establishing a strong digital presence for the business
- **DeenCraft, Islamic Learning Platform** Full-stack live Islamic education platform where qualified scholars teach Nazra, Tajweed, Hifz, and Seerah to students globally in real-time, built on MERN stack with Jitsi Meet video classrooms, Socket.io live chat, role-based dashboards for Students, Instructors, and Admins, and automated class reminders via node-cron and Nodemailer.
- **CoachLaunch, SaaS Product** full-stack AI SaaS that generates a complete coaching business (website, program, bio, email sequences) in 4-5 minutes, built on MERN stack with n8n workflow automation, async webhook architecture, client CRM, and a buyer tracking admin panel.
- **AI-Powered Review Monitoring & Alert System** Developed an end-to-end business reputation management automation using n8n that monitors Google Reviews every 2 hours, filters negative feedback, and delivers instant WhatsApp alerts, reducing owner response time from days to minutes.
- **Ethereal Sanctum, Luxury Med Spa App** Built a 6-page Next.js App Router app featuring scroll-triggered animations, 3D card tilts, parallax, and magnetic buttons. Integrated an AI booking chatbot via n8n + OpenAI with session memory for a seamless in-chat booking experience.
- **AutoFix, Insurance Lead Gen Website** Delivered a full React + Supabase lead generation site within a 7-day deadline, driving a 30% increase in leads and 40% lift in engagement. Secured lead data using Supabase Row-Level Security with no backend server required.
- **Sales & Purchase Dashboard, Shaheen Aerotrader** Built a browser-only React dashboard parsing 1,500+ records across 69+ Excel columns with filtering, search, and pagination. Deployed as a static PWA on Netlify with export-to-Excel functionality and zero recurring server costs.
- **Let'sTalkBPO, Business Website** Scoped and shipped a 4-page React + Vite business site in 7 days with a fully functional EmailJS contact form. Reduced client lead response time to under 1 hour post-launch.
- **Team & Staff Performance Portal** Built a real-time Google Sheets, powered tracking dashboard that reduced manual reporting time by ~50%. Delivered in plain Tailwind CSS, ReactJS with full responsiveness and no separate mobile view needed.
